Modules	Depends on User Story ID	Requirement ID	As a	User Story	So that	Notes
Profile and Identity Module: General			Event Organizer / Team Member / Vendor / Guest / Venue Owner	manage my basic profile information, including name, phone number, email address, password, role, organization, and profile picture	relevant users can identify and contact me when needed	manage = CRUD operations for an account.
Profile and Identity Module: General	1	2	Event Organizer / Team Member / Vendor / Guest / Venue Owner	access only role-relevant information and actions throughout the system	I only see information and actions relevant to my role	
Profile and Identity Module: Vendor Profiles and Customization	1	3	Vendor	edit the agencies and services I can provide on my vendor profile	relevant Event Organizers can contact me for suitable sourcing requests	
Profile and Identity Module: Venue Owner Profiles and Customization	1	4	Event Organizer / Team Member / Vendor / Guest / Venue Owner	I should be able to specify for the profiles relevant to my role and permissions	I can communicate, coordinate responsibilities, maintain privacy, and effectively participate	view profiles
Profile and Identity Module: Team Identity Management	1	5	Event Organizer	invite Team Members and assign them roles in my event team	each member can access the tasks and information relevant to their responsibilities	Organizers invite team members who can then either accept or decline
Profile and Identity Module: Team Identity Management	1,5	6	Team Member	view event team invitations sent by Event Organizers	I can accept or decline joining an event team	
Profile and Identity Module: Team Identity Management	6	7	Team Member	view my assigned role and responsibilities within an event team	I understand what tasks and information I am expected to access	
Profile and Identity Module: Team Identity Management	5	8	Event Organizer	update or remove Team Members from my event team	team access stays accurate when responsibilities change	Organizers can remove or update statuses of already accepted team members
Profile and Identity Module: General	1	9	Event Organizer / Team Member / Vendor / Guest / Venue Owner	identify places to be my account	I can access the Platform features assigned to my role	
Profile and Identity Module: Verification	1	10	Event Organizer / Vendor / Venue Owner	verify my profile using official contact or business information	other users can trust that I am a legitimate participant in the platform	
Evaluation and Reporting Module	14	11	Guest	Rate my experience and give feedback	This event organizer can improve future events	
Evaluation and Reporting Module	11	12	Event Organizer	View the guest ratings	I know how satisfied guests were with my pop-up event	
Guest Management Module	1	13	Event Organizer	Send the guests their profiles	This know about my event	
Guest Management Module	13	14	Guest	Accept/Deny my invitation	The event organizer knows whether I am coming	
Guest Management Module	14	15	Event Organizer	Message the guests that are coming	I can inform them about important event updates	
Evaluation and Reporting Module	45,46	16	Event Organizer	Check the event profits	I know whether the event was profitable	
Evaluation and Reporting Module	-	17	Event Organizer	See the most sold product	I know which product was most popular	
Evaluation and Reporting Module	-	18	Event Organizer	See finished investor items	I know what to increase for the next event	
Evaluation and Reporting Module	16,17,18,20	19	Event Organizer	See charts comparing this event to previous events	I know whether my events are improving	
Evaluation and Reporting Module	14	20	Event Organizer	Check how many accepted guests actually came	I can better estimate attendance for future events	
Vendor Management Module	3	21	Event Organizer	Isolated resources from vendors	I can track costs separately	
Vendor Management Module	21	22	Event Organizer	Invoice requested resources	requests, i.e. orders, can be accepted or rejected	
Vendor Management Module	22	23	Vendor	submit invoices	I can request payment	
Vendor Management Module	23	24	Event Organizer	Invoice submitted invoices	invoices can be accepted or accepted	
Vendor Management Module	21	25	Vendors	create and update delivery times and order's status	I can notify event organizer on delivery timelines	
Vendor Management Module	25	26	Event Organizer	see outstanding order's status	I can easily track all orders simultaneously	
Vendor Management Module	3	27	Vendors	cancel, verify/denies and itemizes	I can verify that I am a legitimate supplier	
Vendor Management Module	25	28	Vendors	claim delivery proof	I can fairly receive delivery disputes	
Vendor Management Module	24	29	Event Organizer	flag a payment as paid	I can clearly notify vendor that all payments are complete	
Vendor Management Module	21	30	Event Organizer	Complete prices from multiple vendors	I can make the most cost-effective decisions	
Venue Search and Booking Module	1,2,4	31	Venue Owner	perform CRUD operations on my venue listings	I can accurately showcase my available spaces to pop-up café organizers to avoid inaccurate listings	
Venue Search and Booking Module	31	32	Venue Owner	perform CRUD operations on a calendar of available dates for my venues	organizers know exactly when the space can be booked and view its availability to avoid double bookings	
Venue Search and Booking Module	37	33	Event Organizer	Make a venue with a setup for the venue after my event concludes	other organizers can make informed decisions based on my experience	
Venue Search and Booking Module	31	34	Event Organizer	view detailed information, photos, and floor plans of a specific venue	I can make sure the photos fit the description and that I can get all relevant information before booking	
Venue Search and Booking Module	34	35	Event Organizer	shortlist or save my favorite venues by adding it to a wishlist	I can compare my top choices before making a final booking decision	
Venue Search and Booking Module	32,34	36	Event Organizer	submit a booking request for a specific venue	I can secure a location for my upcoming event	
Venue Search and Booking Module	36	37	Venue Owner	review, accept, or reject incoming booking requests from organizers	I can control who uses my space, and to prevent double bookings	
Venue Search and Booking Module	36	38	Event Organizer	track the status of my venue applications (e.g., pending, approved, rejected)	I am always updated on my booking progress	
Venue Search and Booking Module	1,3,31	39	Event Organizer	search for available venues by keyword, name, or location	I can quickly discover spaces in the specific area I want to host my pop-up café	
Venue Search and Booking Module	39	40	Event Organizer	filter venue search results by date, size, and price	I can narrow down my options and apply my own criteria to avoid places that do not fit my exact needs	
Event Planning Module (Outlets Daily Workflow and Task Management)	1	41	Event Organizer	view a audited data task checklist automatically generated based on my event date	I know exactly what needs to be done each day in the lead-up to the event	
Event Planning Module (Outlets Daily Workflow and Task Management)	1,41	42	Event Organizer	create, assign, update, and delete tasks for my team members	responsibilities are clearly distributed and tracked throughout the planning process	CRUD on tasks entity
Event Planning Module (Outlets Daily Workflow and Task Management)	42,43	43	Team Member	view and updates the completion status of tasks assigned to me	the organizer is kept informed of my progress without needing to follow up manually	
Event Planning Module (Outlets Daily Workflow and Task Management)	42	44	Event Organizer	set deadlines on tasks and receive automated reminders for upcoming and overdue ones	nothing is missed during the short and intense planning window	
Event Planning Module (Budget Management)	1	45	Event Organizer	create, update, and delete a budget plan including expense categories, estimated costs, and actual costs	I have a structured financial plan for my event in one place	CRUD on budget entity
Event Planning Module (Budget Management)	45,23,24,29	46	Event Organizer	view a real-time summary comparing my planned budget against actual spending per category	I can identify corresponding early and make adjustments before the event	
Event Planning Module (Budget Management)	45,46	47	Event Organizer	export my budget report in CSV or PDF format	I can share financial summaries with stakeholders or reference them for future events	
Event Planning Module (Venue Layout)	36,37	48	Event Organizer	create and edit a digital floor plan for my venue, including tables, stations, entrances, and exits	the intended layout is clearly designed and documented before setup day	CRUD on floor plan entity
Event Planning Module (Venue Layout)	48,9	49	Event Organizer	share the venue floor plan with my event team members	everyone involved in setup has access to the latest version without needing direct instruction	
Event Planning Module (Venue Layout)	49,6	50	Team Member	view the shared venue floor plan for my assigned event	I can set up the space correctly and independently on the day	

Requirement ID	Name	Description	Measurement	Corresponding Functional Requirements
1	Performance	The system should load user profiles, role-based pages, and dashboard content within 3 seconds under normal network conditions to ensure users can access relevant information without noticeable delays.	At least 95% of user profile pages, role-based pages, and dashboard pages should load within 3 seconds under normal network conditions.	Global, applies to FR 1-50
2	Availability	The system should maintain at least 99% uptime during the event planning period so that organizers, team members, vendors, guests, and venue owners can reliably access the platform when needed.	The system should have 99% or higher uptime.	Global, applies to FR 1-50
3	Security	All user passwords must be encrypted using industry-standard hashing so that user credentials are protected in the event of a data breach.	100% of user passwords must be stored in encrypted hashed form and never stored as plain text.	1, 9
4	Robustness	If a specific function or module fails, the system must handle the error and return the user to a stable, default state (such as the home dashboard) rather than crashing the entire application.	The system must catch 100% of module failures and redirect the user to a stable state within 2 seconds, with an appropriate error message.	Global, applies to FR 1-50
5	Ease of Use	The system should provide a simple and intuitive user interface so that users can navigate and complete tasks without requiring technical training.	New users can complete basic tasks within 5 minutes without technical training.	Global, applies to FR 1-50
